## SPEAKER LEVEL CONVERTERS

### SLC-4

4 Channel speaker level converter  
(adjustable)  
80 watts per channel  
Can be used as a 4-channel line out converter to add an  
amplifier to any existing car stereo or add low level outputs  
to any car stereo with speaker outputs only. Can also be used  
to interface an aftermarket car stereo to either JBL / Premium  
sound system or BOSE audio systems.  
Transformer circuit for noise cancellation.  
Also is a common ground adaptor.

### LOC-80

2 channel speaker  
level converter  
(adjustable)  
80 watts per channel
